

# Assignment - Full Functional Stack Functional Programming

Anders Kalhauge and Jens Egholm Petersen

Spring 2017

Create a full functional stack application based on your solution from the “Websocket chat server assignment” and the template Haskell Web Server presented in class.

The code can be found at:

<https://github.com/cphbus-functional-programming/haskelm.git>

Remember that <https://www.haskell.org/hoogle/> is your friend.

The solution accompanied with a short description in a README.md file should be uploaded (pushed) to a git repository, and a linked send to JEEP **and** AKA, no later than Thursday May 18. 08:00.
